

## Digital Lockout / Tagout Ensure compliance – Go paperless

tec.dloto is a powerful web and mobile-based Lockout/Tagout (LOTO) management platform that digitizes and simplifies the entire energy isolation process. It transforms traditional paper-based LOTO procedures into a secure, efficient, and fully digital system – enhancing worker safety, reducing operational delays, and ensuring audit readiness.

Designed for maintenance teams, safety officers, and plant leaders, tec.dloto delivers guided workflows, real-time monitoring, and centralized records to strengthen accountability across every LOTO activity. The platform is fully aligned with OSHA 29 CFR 1910.147 standards, ensuring organizations maintain compliant, consistent, and repeatable energy control procedures across all machines and sites.

## Why teams choose tec.dloto

**Improves safety culture** with standardized, visual, and error proof LOTO workflows.

**Accelerates maintenance turnaround** through instant access to approved procedures and fast mobile approvals.

**Strengthens compliance confidence** with OSHA aligned workflows and fully audit ready digital records.

**Delivers real time LOTO visibility** using dashboards that track every lock, user action, and step across sites.

**Reduces training effort** by guiding new technicians with clear visual instructions and digital step by step flows.

**Eliminates paper dependency** by digitizing procedures, logs, approvals, and evidence capture end to end.

**Improves accountability & governance** with role based permissions and complete user level audit trails.

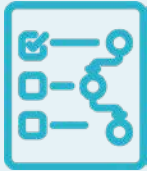

**Scales effortlessly across plants** using bulk uploads, standardized templates, and centralized machine data.

**Enables mobile first operations** allowing technicians to execute, capture evidence, and approve directly on the shop floor.

**Future proofs safety programs** with a modern platform ready for new modules like Permit to Work.

## How tec.dloto works?

### Procedure management

- create machine specific procedures
- Annotate images for isolation clarity
- Approve through structured workflow
- Download auto generated PDFs

### LOTO compliance

- Scan QR
- follow the step-by-step instructions
- Capture live image
- Approval workflow (optional) start maintenance

### Reports

- Plant level reports
- Audit of each loto activity
- End to end visibility

## Key capabilities at a glance

- Annotated visuals for precise isolation guidance
- Cross device procedure creation (web/tablet/mobile)
- Bulk machine onboarding & procedure rollout for large asset bases
- Mobile first execution with step by step digital workflows
- Automatic versioning, audit trails & complete activity logs
- Eliminates paper based LOTO and outdated printed documents
- Real time monitoring of active LOTO across machines and teams
- OSHA aligned procedures, training validation and compliance controls
- Centralized machine data for accurate, consistent procedure creation
- Role based permissions ensuring controlled access and accountability
